

reforming, deforming (ir)-regularities (2019-20)

IDEA(S)

Formation of (ir)-regularities: re-formation and de-formation

morphing: “changes through a seamless transition”

*Morphing is a special effect in motion pictures and animations that **changes** one image or shape **into another through a seamless transition**. Traditionally such a depiction would be achieved through **dissolving techniques** on film*

Ana-morphosis

Is a perspective technique that gives a distorted image of the subject represented in a picture when seen from the usual viewpoint but so executed that if viewed from a particular angle, or reflected in a curved mirror, the distortion disappears and the image in the picture appears normal.

Link: <https://www.youtube.com/watch?v=VR8HT6bAmAc>

Met-amorphosis

Metamorphosis is a process by which an entity develops after involving a conspicuous and relatively abrupt change in its structure through extension, alternation and differentiation.

<https://www.youtube.com/watch?v=0g31LoV0nfk>

Para-morphosis

Just saturate it; distort it; kill it!

Link: <https://www.youtube.com/watch?v=HouqIwTOLiY> (maybe?????????)

"deviations from a common point"

Brainstorming: keywords and first impressions

Starting point, repetition, variance and invariance of pitches and durations, thickness, porosity, luminosity, (micro)-polyphony, divergence-convergence
